## **QUICK GUIDE** WEB EDITION

### **REAR SEAT ENTERTAINMENT SYSTEM**

Your car is equipped with an exclusive multimedia system. The Rear Seat Entertainment system expands the normal audio system in the car with: two screens, A/V AUX input for connection of e.g. video or games console, wireless headphones and remote control.

This system makes it possible to watch video, play back music, listen to radio, watch TV\* or connect other external devices (e.g. a games console).

The system can be controlled from the front screen (parental control).

More information about the system is available in the normal owner's manual for the car, chapter "RSE - Rear Seat Entertainment system".

Volvo reserves the right to make changes without prior notice.

Options are marked with an asterisk (\*).

<sup>A</sup> The function is not available in the rear screens.

**1** Scroll wheel, equivalent to **TUNE** in the centre console.

### TO USE

The remote control can be used for all functions in the infotainment system, and for the front screen as well.

To use:

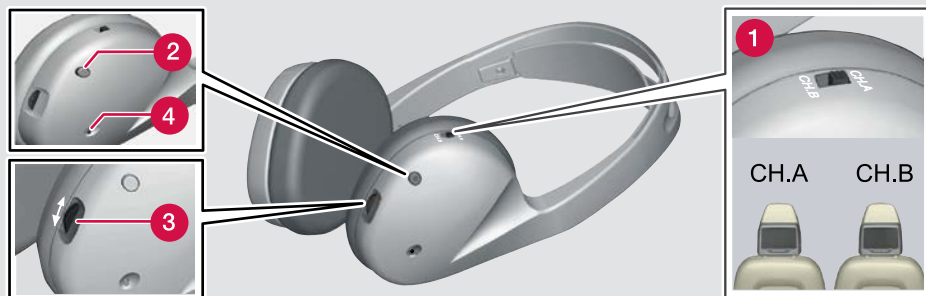

1. First press the button  to select screen.
2. Then aim the remote control at the screen.

### WARNING

Store loose objects such as mobile phone, camera, remote control for extra equipment, etc. in the glovebox or another compartment. Otherwise these could cause injury to occupants in the car in the event of sudden braking or a collision.

## AUDIO SYSTEM

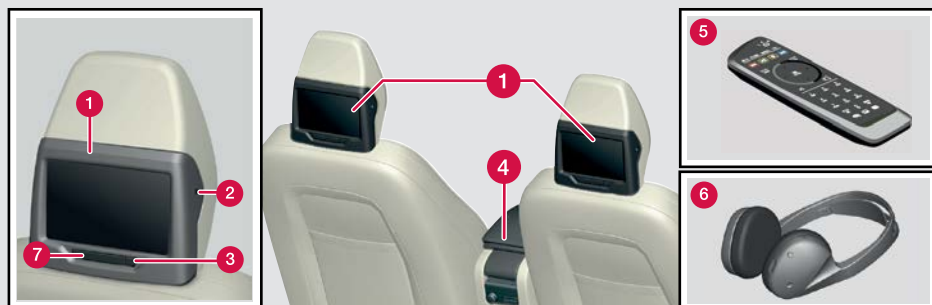

You can listen with the system's wireless headphones or choose to plug your own headphones into the headphone jack.

The wireless headphones are activated with the **On/Off** button (2). An indicator lamp illuminates (4). Select **CH.A** (channel A) or **CH.B** (channel B) with the control (1). Adjust the volume with the volume control (3). The headphones are switched off automatically after approx. 3 minutes when not in use.

### HEADPHONE JACK IN HEAD RESTRAINT

Adjust the volume with the remote control.

## SYSTEM OVERVIEW

- 1 Screen
- 2 Headphone jack
- 3 On/Off button
- 4 USB, AUX and A/V AUX input

- 5 Remote control
- 6 Headphones
- 7 IR receiver/transmitter

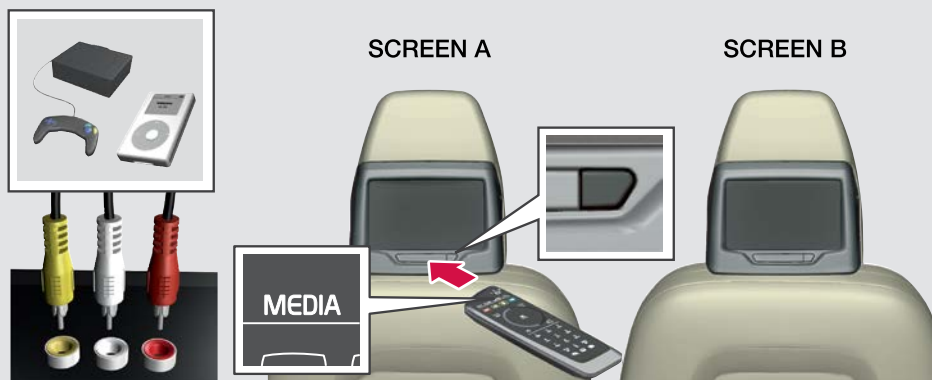

For media player and 12 V socket, see the owner's manual for the car.

## ACTIVATING THE SCREEN AND HEADPHONES

Switch on the rear screen by pressing the On/Off button on the screen.

1. Switch on the wireless headphones, select **CH.A** for left-hand screen or **CH.B** for right-hand screen, or connect your own headphones into the headphone jack on the side of the head restraints.
2. Select the screen to be controlled with the button  on the remote control.

## PLAYING BACK AUDIO/VIDEO VIA THE A/V-AUX INPUT

### CONNECTING EQUIPMENT VIA A/V AUX

External equipment, such as a games console can be connected via the A/V AUX input.

- Yellow connector - video cable
- White connector - left channel for audio
- Red connector - right channel for audio

Connect the power cable to the electrical socket if your equipment is designed for 12 V.

Always follow the instructions for the external equipment when connecting.

### PLAYING BACK AUDIO/VIDEO VIA THE A/V-AUX INPUT

1. Aim the remote control at the IR receiver on the screen and press **MEDIA**, turn **TUNE** to **A/V AUX**, confirm the selection with .
2. Switch on the connected device and press **PLAY** or equivalent on the connected device.
