- 19 Traffic information
- 20 Section covered by traffic information
- Arrow on outer compass ring indicates direction to destination
- Compass

ROAD AND TRAFFIC INFORMATION - RTI

Volvo's navigation system is a traffic information and guidance system developed by Volvo. The system guides you to a destination and provides information along the route. This provides information on situations which may make your drive more difficult, e.g. accidents and roadworks, and shows you alternative routes.

It is possible to set up an itinerary, search for facilities along the route, store special locations, etc. The system indicates the current position of the car and does not allow wrong turns that would prevent you from reaching the chosen destination.

You will learn how intuitive it is to use. Try it out. We also recommend that you familiarise yourself with the information in this manual in order to derive most enjoyment from the system.

The Volvo navigation system helps to bring about a better environment by making it easier to get to where you want to go and shorten the distances you have to drive.

GET TO KNOW YOUR NAVIGATION SYSTEM

01 Get to know your navigation system

Manual

General information on the manual

The manual describes general functions for all markets, but market specific information may also be included.

Like the system, the manual is divided into **Easy** and **Advanced** user settings.

Menu options/Search paths

All options that can be selected on the display are marked in the manual with slightly larger and grey-shaded text, e.g. **Set destination**.

Search paths in the menu tree are stated as, e.g.:

Set destination → Address → City

Special text

NOTE

Texts marked with NOTE give advice or tips that facilitate use of features and functions for example.

Footnote

There is information in the manual that is added as a footnote at the bottom of the page or in direct association with a table. This information is a supplement to the text to which it refers via the footnote number.

Changes in the manual

The specifications, design features and illustrations in this owner's manual are not binding.

We reserve the right to make modifications without prior notice.

© Volvo Car Corporation

Before starting

General

The navigation system can be used without a destination being selected. The map with the position of the car is shown on the screen and the car is shown with a blue triangle.

The system is updated continuously and could therefore contain functions not described in this manual.

The system content may vary slightly from country to country and some menu options are not available to all countries for technical reasons.

Startup

Observe all traffic rules and drive safely. Read all important pages in user manual. You are responsible for safety at all times.

For map update information, please refer to: www.volvocars.com/navi

Press BACK to decline and exit the system.

Press ENTER on a preferred user mode to confirm your agreement and begin navigation.

Easy mode

Advanced mode

The system starts by displaying a screen where you have to confirm the text content by pressing **ENTER** after selecting **Easy** (**Easy mode**) or **Advanced** (**Advanced mode**).

Map mode

After Startup, the Main menu is displayed briefly until the screen switches to Map mode. At this point, the current map covers the entire screen.

- Press BACK to activate the Main menu, see page 30.
- Press ENTER to activate the Quick menu, see page 30.
- Press the navigation button to activate Scroll mode, in order to view parts of the map that are outside of the screen for example.
- In this mode ENTER activates the Scroll menu, see page 30.

Settings

The system is supplied with default settings, but starts with the settings last made.

If a setting has been changed and the factory setting is required again then only the current function is affected.

There is no function that resets all settings simultaneously.

On/Off

On

The system is switched on automatically when the ignition key/starter knob ¹ is turned to position **I** or **II**.

If the system has been switched off manually, it must also be switched on manually as follows:

- The ignition key/starter knob must be in position I or II (see the instruction manual for the car).
- 2. Press ENTER or BACK.
- 3. The screen is activated.

The system may need a few seconds in order to detect the position and movement of the car.

Off

The system is switched off automatically when the ignition key is turned to position ${\bf 0}.$

The system can be switched off manually so that it does not start automatically the next time the ignition key is turned to position **I**, as follows:

1. Press **BACK** to reach the Main menu.

¹ Used instead of an ignition key in cars fitted with the Keyless system.

01 Get to know your navigation system

Before starting

- Scroll to Shut down with the navigation button.
- 3. Press ENTER.
- 4. The screen is powered down.

NOTE

The system can be accessed even if the engine is switched off. For this reason, remember that frequent use of the navigation system with the engine switched off could discharge the start battery.

Simple/Advanced setting

When the navigation system starts up the required user settings are selected.

Easy

Only the most important menus are available in this mode. Suitable for simply travelling from point A to B.

Advanced

All settings and functions are available in this mode.

Switching between settings

It is possible to switch between Easy and Advanced settings under Settings.

Settings made in Easy mode do not transfer over to Advanced mode and vice versa, but instead are stored in each respective mode.

Refer to the following page to see which menus differ between the two options.

Demo (simulated guidance)

Specify a destination in order to obtain an overview of how guidance works. Guidance to the specified destination can be simulated when the car is stationary.

This function is available only in mode Advanced.

For more information on Demo, see page 59.

01 Get to know your navigation system

Component location and functions C30

Component location and functions C30

Main unit

The system is hard disk based. For more information, see page 26.

The main unit is fitted in the glovebox and includes the following functions:

- Calculating the position of the car
- Calculating the route to the specified destination
- Handling traffic information
- Voice guidance
- Storing map data
- DVD player; for updating the map data and software.

NOTE

The main unit's DVD player is only designed for Volvo's map discs.

The GPS and TMC receivers are integrated in the main unit.

Positioning

The car's speed sensor and a gyro calculate the current position and the direction of travel of the car using signals from the GPS satellite system.

The advantage of this concept is that the navigation system registers and calculates the

route outline even if the GPS signal is temporarily lost, e.g. when driving through a tunnel.

Traffic information

TMC (Traffic Message Channel) is a standardised coding system for traffic information. The receiver automatically searches for the correct frequency. Reception takes place via the FM antenna.

The coverage area of the system is under constant development which is why updates can sometimes be necessary, see page 26.

Irrespective of whether Easy or Advanced user settings are selected, traffic information transmitted is always received and presented. For more information, see page 62.

2 Speakers

Navigation system audio uses the front loudspeakers.

3 Keypad

The keypad is located on the right-hand rear side of the steering wheel. Use it to scroll between different menu options, to confirm selections or to move back in menus. For more information, see page 22.

4 Screen

The screen displays maps and provides detailed information on route type, distance, menus etc. For screen care, see page 26.

5 IR receiver

The IR receiver for the remote control is located adjacent to the screen on the speaker grille. For more information, see page 22.

6 IR receiver

The IR receiver for the remote control is located in the audio system's control panel. For more information, see page 22.

01 Get to know your navigation system

Controls

Keypad location and IR receiver

The navigation system is controlled with the steering wheel's keypad or the remote control.

The keypad is located on the right-hand rear side of the steering wheel.

Aim the remote control towards the IR receiver located on the loudspeaker grille adjacent to the screen or in the audio system's control panel (XC90 only).

NOTE

The remote control contains AAA or R03 batteries. If the remote control ceases to function, try changing the batteries first.

Keypad, steering wheel/remote control

The steering wheel keypad and the keypad on the remote control have the same functions. Use the keypad to scroll through different menu options, confirm selections or move back in menus.

The design may vary for different models.

1 Navigation button

Scroll between different menu options using the **navigation button**, the keypad's locating pin or the remote control's arrow keys \leq , \wedge ,

➤ and **V**. The navigation button also moves the cursor (hairline cross) on the map.

2 ENTER

Confirms or activates selections.

3 BACKSPACE

Undoes the most recent selection or goes back in the menu structure.

"Do not disturb"

In some situations, the system requires a few extra seconds to make a calculation. A symbol is then displayed on screen.

$|\mathbf{i}|$

NOTE

When the calculation symbol appears, the system is unable to accept any commands from the **navigation**, **ENTER** or **BACK** buttons.

Keyboard

Entering and selecting options

The keyboard is used in many places within the menus for entering specific information, e.g. type of facility, country, city, street address, street or post code.

- Select the letters using the navigation button and press ENTER.
 - > When there are no further alternatives the remaining letters in the name are entered automatically.

The list at the bottom of the screen shows the first three possible alternatives matching the letter input.

- It is also possible to scroll down using V
 to directly access alternative names on the
 list.
- 3. Select the alternative and press **ENTER**.

The scroll bar on the right-hand side of the list shows that there are more alternatives in the list than those shown on the screen. The number (110) indicates the number of options.

- Return to the character chart from the list of alternatives using BACK.
- 2. Delete the input letters entered one at a time using **BACK**.

General search

The search function is always available and always works in the same way irrespective of menu status when a location is entered.

If **ENTER** is pressed during an input then all reply combinations are shown for each respective alternative: City, street, facility etc.

For example, if a search is made for a name such as London Airport then all London combinations will be shown when LO is input. The more letters you input the more specific the reply.

A search for LO also provides reply alternatives such as Restaurant Lou Trivalou for example, as alternatives containing several words separated by spaces are included in the search.

01 Get to know your navigation system

Display modes and voice messages

Display modes and voice messages

Different display mode appearances

The appearance of the screen image depends on geographic position and the settings made, e.g. map scale, symbols selected for display etc.

Explanations for the text, signs and symbols that may appear on the screen are available on the inside of the cover.

- Facilities along the motorway. This function is available even if a destination has not been entered. Only shown when driving on the section of motorway in question. Press ENTER on the symbol for Facilities on the far right on the Quick menu, see page 41.
- 2 Detailed junction map. The left-hand section of the screen enlarges the navigation at the next junction. (Alternative navigation options are only shown for major roads.) The situation is always supplemented by a voice message.
- Two maps can be selected as display mode. The screen shows the same map image but in two different scales. Shown following ENTER on the symbol for Map/ Route outline in the Quick menu, see page 40.
- 4 Scroll mode, see page 30 and 42.

Voice messages

After a destination has been set, Guidance is activated and when a junction or exit is approaching the system generates a voice message stating distance and type of manoeuvre. At the same time a detailed map of the junction is displayed. The voice message is repeated closer to the junction.

Guidance with voice messages can be obtained at any moment using **ENTER** on the Quick menu's symbol for Guidance, see page 30 and 40.

NOTE

In some cases, e.g. during a carphone call, a voice message is replaced with a pling tone.

Toll roads

Some areas include toll roads. When a toll booth is approaching, a voice message indicates this.

A destination must be input in order to receive the message.

Compass

The map image can show the compass in two different ways:

- With the compass direction north always facing up.
- With the direction of travel always facing up.

The red tip of the compass needle points north on the map and the white tip points south.

The grey destination arrow in the outer ring of the compass points in the direction of the selected destination.

Go to Settings → Map options → Map orientation to select how the map direction is to be displayed and to Compass to select how the compass is to be displayed, see page 57.

01 Get to know your navigation system

Main unit, updating, maintenance

Contents in main unit

All map information is pre-installed on the main unit hard disk. There is no DVD disc in the unit at delivery. A DVD disc is not used until a map data update, refer to the package's instructions.

DVD discs with updated and additional information are issued regularly. Contact a Volvo dealer for the latest issue.

See also www.volvocars.com/navi for further information on maps etc.

NOTE

The main unit's DVD player is only designed for Volvo's map discs.

Screen care

Clean the screen with a soft, lint-free rag, lightly moistened with clean water or mild window cleaning agent.

Care of DVD discs

Handle DVD discs with care. When they are not in use they must be stored in their packaging. Avoid storing them in damp, excess heat, direct sunlight or dusty surroundings.

Updating with DVD disc

NOTE

Make sure that the car's electricity supply is safeguarded as an update can take up to approximately 2 hours.

If the DVD disc, apart from new map discs, contains new software then this part starts first.

The car can be driven while map information is being updated but the system cannot be used while the update is in progress.

- 1. Switch on the system.
- Eject any DVD disc that is loaded in the unit.
- Load the DVD update disc. If there are several discs then load them in numerical order.
- The system now updates automatically. The information shown indicates progress achieved.

After the update the DVD disc with the latest update must remain in the unit. If there is more than one disc then disc no. 1 must be used. If the disc is removed from the main unit then the system ceases to function.

If the system is switched off while the update is in progress then it continues automatically next time the system is activated.

In some cases map information updates can add new functions to the system.

When the update is finished the start screen is displayed.

Interrupted update

If an update is interrupted then it can be resumed. During the subsequent start-up, select the **Resume map update** option in the Navigation menu.

The update then resumes, not from the start, but from where the system detects that the update was interrupted.

SIMPLE USER SETTINGS

Menus

General

When the navigation system starts up the required user settings are selected **Easy**.

In Easy mode, only the most important menus containing the most common functions are accessible.

Main menu

The main menu is at the top of the menu tree and can be reached by pressing the **BACK** key several times.

It is possible to switch from Easy to

Advanced user settings in the main menu

under: Settings → System options → User

mode.

Quick menu

The most common functions are collected together in the Quick menu, which makes them easier to access while driving.

- 1. Press **ENTER** in Map mode.
- 2. Select a symbol using < or >.

Most system settings can be made under **Settings** in the Main menu while others can only be accessed via the Quick menu.

- Map scale

A menu containing two options is displayed.

Pressing **ENTER** on the options (+) or (-) changes the map scale in various stages, from 50 metres up to 100 km, to give you a greater perspective or allow you to see more details. Stepless changing is possible if you hold down **ENTER** - release the button when the scale is suitable.

- Guidance

Pressing **ENTER** provides current voice guidance.

Traffic information ¹

Irrespective of whether Easy or Advanced user settings are selected, traffic information transmitted is always received and presented. For more information, see page 55 or 62.

Scroll menu

Map scroll

In Scroll mode, a hairline cross is manoeuvred over the map image.

 Activate Scroll mode (Scroll menu) by scrolling with the navigation button.

The longer you hold down the button, the faster the hairline cross moves across the map.

Menu

 Press ENTER in Map scroll mode to view the Scroll menu.

Does not apply to all areas/countries.

02 Simple user settings

Menus

Scale (Scale)

Changes the size of the map image to provide a larger perspective or more detail.

Pressing **ENTER** on the options (+) or (-) changes the map scale in various stages, from 50 metres up to 100 km.

Stepless changing is possible if you hold down **ENTER** - release the button when the scale is suitable.

Set as destination (Set as destination) Selects the location marked by the hairline cross as a destination by pressing **ENTER**. Guidance starts immediately. 02

02 Simple user settings

Menu tree

Menu options

Shown here are three of the menu tree's levels. Several of the menus at level three have further submenus - these are described in more detail in their respective sections.

Set destination	page 33
Address Country City Street No. Intersection	page 33
Facilities Country City Type Name	page 34
→ Last 20	page 34
→ Point on map	page 35

Show destination	page 36
Delete destination	page 36
Settings	page 37
→ Guiding voice Female/Male	page 37
→ Guiding volume Off/1/2/3/4/5	page 37
→ Language	page 37

→ Map view 2D/3D	page 37
→ User mode Simple/Advanced	page 37
Shut down	page 9

02

Set destination

Address

Set destination → Address

Enter street address

The system places the cursor on Street (Street) first. The last selected Country (Country) is preselected.

If this is not the case:

- 1. Scroll to Country (Country) and/or City (City) and press ENTER.
- 2. Or choose from between the most recently selected using >.

(For information on using the keyboard, see page 23.)

NOTE

The system starts with Street in order to avoid misunderstanding when two nearby cities/localities have grown together.

Alternative 1

Select Street (Street) without selecting a

If the street name exists in several cities then a list is shown with alternatives to choose between. The system guides to the centre of the selected street.

Alternative 2

- 1. Start by selecting City
- Then select Street.

NOTE

The definition of city or area can vary from country to country, and also within the same country. In some cases a metropolitan area is indicated - in others an individual suburb.

For smaller localities there are no street addresses stored in the system. The centre of the locality should always be selected as the destination.

Specify street number

If the selected address has a street number then this can be specified to clarify the destination.

- 1. Scroll to the line for Number after specifving the street address, and press ENTER.
 - > Alternative street numbers are shown
- 2. Specify required street number.
- Scroll to Select and press ENTER.
 - > The address selected appears in the itinerary.
- 4. The cursor appears on Start press ENTER again.
 - > Route indication starts.

Alternatively:

Scroll to Start and press ENTER.

02 Simple user settings

Set destination

> Route indication starts immediately.

If the street number is not specified then the system guides to the middle of the selected street.

Select

Confirms input number.

Cancel

Go back to previous screen.

Set junction

Start guidance

Scroll to Start guidance to start the guidance.

Search by post code

Set destination → Address → City

Instead of searching in a city you can choose to search within a post code area.

- 1. Select City and press ENTER.
- Scroll to Post code and press ENTER.
- 3. Select the characters and press ENTER or select from the list of alternatives.
- Scroll to Street to choose between addresses with the selected post code and press ENTER.

5. Scroll to Start guidance to obtain guidance to the destination.

Search in facilities

Set destination → Facilities

Facilities is a collective name for petrol stations, hotels, restaurants. Volvo dealers, hospitals, car parks etc.

Press ENTER to access a submenu with different search options in order to set a facility.

Country (Country)

Enter and select country and press FNTFR

City (City)

Enter and select city and press ENTER.

Type (Type)

Enter and select type of facility and press ENTER.

Name (Name)

Enter the name of a facility, or select from among the alternatives in the menu.

The list only displays the facilities in the selected city/selected area.

Select from among the last 20

Set destination → Last 20

A list with the twenty most recent destinations is displayed.

Scroll to the desired destination using >
 or ENTER to access the submenu.

Set as destination

Adds the destination to the itinerary.

Delete location

Deletes the location from the Last 20 list.

Point on map

Set destination → Point on map

- Use the navigation button to move the hairline cross to the required destination, then press ENTER to access the Scroll menu, see page 30.
- Scroll to Set as destination and press ENTER.

NOTE

It is also possible to search directly on the map with the hairline cross by using the **navigation button** in Map mode.

02 Simple user settings

Show/Delete destination

Show destination on map

Show destination

 Press ENTER to obtain a map overview of the area you set as final destination.

Delete destination

Remove destination

- 1. Press **ENTER** to reach the destination to be deleted.
- Press ENTER again to delete the destination.

02

Guiding voice

Settings → Guiding voice

Set female or male guiding voice 1.

Guiding volume

Settings → Guiding options

Select the volume of voice messages, or switch them off completely.

Language

Settings → Language

Set language for menus, text and voice messages.

Map & menu colour

Settings → Map & menu colour

There are four screen display settings - select the one that suits you best.

2D or 3D

Settings → Map view

The map can be displayed in 2D (from directly above) or 3D (obliquely from above).

User mode

Settings → User mode

Switch between Easy and Advanced user settings.

¹ Not applicable to the Netherlands. Instead there is the choice of language between **Nederlands** and **Belgisch**.

ADVANCED USER SETTINGS

Menus

General

When the navigation system starts up the required user settings are selected Advanced.

Access to all of the navigation system's settings and functions is available in the Advanced mode.

Main menu

The main menu is at the top of the menu tree and can be reached by pressing the **BACK** button one or more times.

It is possible to switch from **Advanced** to **Easy** user settings in the main menu under:

Settings → System options → User mode

Quick menu

The most common functions are collected together in the Quick menu, which makes them easier to access while driving.

- 1. Press **ENTER** in Map mode.
- Select a symbol using

 or

Most system settings can be made under **Settings** in the Main menu while others can only be accessed via the Quick menu.

- Route outline/Scale

A menu containing four options is displayed.

Pressing **ENTER** on the option at the top displays a map showing the remaining route outline ¹ from the current position to the destination.

Pressing **ENTER** on the second option displays a map showing the entire route outline¹ from start to destination.

Pressing **ENTER** on the options (+) or (-) changes the map scale in various stages, from 50 metres up to 100 km, to give you a greater perspective or allow you to see more details.

Stepless changing is possible if you hold down **ENTER** - release the button when the scale is suitable.

If you opt to display two maps, the map scale symbol appears at either end of the Quick menu so that you can adjust the relevant scale individually.

- Guidance

Pressing **ENTER** provides current voice guidance.

- Map/Route outline

Route outline

Pressing **ENTER** displays a list of approaching waypoints. The distance between waypoints and type of manoeuvre are displayed in addition to the road name.

One map/Two maps

Pressing **ENTER** displays one large or two smaller map images of the current area. Different scales may be input for the respective maps.

Surveillance ²

Allows you to save map views of three different monitoring areas, e.g. roads with high traffic

¹ A route must be selected

² Only in areas that can receive traffic information.

Menus

densities that are often subject to traffic problems.

Select Surveillan.1, 2 or 3. To view previously set surveillances, see page 42.

- Diversion

Displays a menu with Avoid and the options 1-5-10-20-40-80 km.

Avoid streets/roads

This function deselects streets or roads from an itinerary set up so that you do not have to drive through a known roadworks area, for example.

- Select Avoid in the Diversion menu and press ENTER. A list of streets/roads included in the route outline is shown.
- Scroll to the street/road to be avoided and press ENTER.
- If several streets/roads are to be avoided, start by scrolling using V to the first street/ road in the group to be avoided, then press ENTER. Then scroll to the last street/road in the group to be avoided and press ENTER.

The system then calculates, as far as possible, a new route outline which leads back to the

original route outline only once the specified stretches have been avoided and passed.

Avoid stretch within 1-80 km

This function deselects an entire area in the original itinerary so that you do not have to drive through a densely populated area in rush hour, for example.

Select an option from the diversion menu
 1-80 km and press ENTER.

The system then calculates, as far as possible, a new route outline which leads back to the original route outline only once the specified area has been avoided and passed.

It is also possible to avoid an area by marking a square area directly on the map, see **Avoid** specified areas under

Settings → Route options

on page 56.

- Traffic information 3

Displays a menu containing different options for viewing information on traffic problems within the area displayed on screen.

A change in the scale affects the number of messages shown, see page 65.

Read message

Pressing **ENTER** allows you to scroll through the traffic messages displayed on screen.

Show all

Pressing **ENTER** displays all messages.

Hide all

Pressing **ENTER** hides all messages.

Show selected

Pressing **ENTER** allows you to select the type of traffic messages to be displayed in the map.

Irrespective of whether **Easy** or **Advanced** user settings are selected, traffic information transmitted is always received and presented. For more information, see page 62.

- Facilities

Displays a menu containing various options for searching for a facility.

Around the car

Pressing **ENTER** allows you to search around the car. See page 47

Along the route

Pressing **ENTER** allows you to search along the route. See page 47

³ Does not apply to all areas/countries.

03

03 Advanced user settings

Menus

Along the motorway

Pressing **ENTER** allows you to search for rest areas, petrol stations and restaurants that are readily accessible along the motorway.

If a calculated route extends over several motorways then the system only searches along the section of motorway currently being used.

Scroll menu

Map scroll

In Scroll mode, a hairline cross is manoeuvred over the map image.

 Activate Scroll mode (Scroll menu) by scrolling with the navigation button.

The longer you hold down the button, the faster the hairline cross moves across the map.

Menu

 Press ENTER in Map scroll mode to view the Scroll menu.

Scale (Scale)

Changes the size of the map image to provide a larger perspective or more detail.

- Pressing ENTER on the options (+) or (-) changes the map scale in various stages, from 50 metres up to 100 km.
- Stepless changing is possible if you hold down ENTER - release the button when the scale is suitable.

Set as destination (Set as destination) Selects the location marked by the hairline cross as the destination.

Press ENTER. Guidance starts immediately.

Facilities around (Facilities around)
A menu is displayed.

 Choose between the Last 5 and All types to search for facilities within the local area.

Read traffic msg. (Read traffic msg.)
Searches for current traffic messages within the area.

Surveillance (Set for surveill.)³ Pressing ENTER displays a menu containing various options.

Select between **Surveillance 1**, **2** or **3** and press **ENTER** to store a map view you want to save as a surveillance area, e.g. heavily trafficked roads that are often subject to traffic problems.

Activating the map
Selects map options in the Quick menu.

Select required surveillance.

Store location (Store location)
Saves a selected location, which then appears under:

Set destination → Stored locations

³ Does not apply to all areas/countries.

Menus

Follow route in itinerary

To be able to easily follow a set route in the itinerary, there is a built-in "magnet function" where - regardless of how the route outline turns and changes compass direction - the hairline cross follows the route outline automatically by simply holding down a button.

One of the lines on the hairline cross indicates which button is to be selected - it appears "fatter" than the other one.

The route outline is followed automatically using button **≺** or **>**.

The route outline is followed automatically using button $\boldsymbol{\Lambda}$ or \boldsymbol{V} .

If no "magnet function" is required, the "fat" hairline cross line disappears when you scroll the hairline cross a few millimetres off the selected itinerary. The scroll function then returns to normal.

03 Advanced user settings

Menu tree

Menu options

Shown here are three of the menu tree's levels. Several of the menus at level three have further submenus - these are described in more detail in their respective sections.

Set destination

Address

Set destination → Address

Enter street address

The system places the cursor on Street (Street) first. The last selected Country (Country) is preselected.

If this is not the case:

- Scroll to Country (Country) and/or City (City) and press ENTER.
- Or choose from between the most recently selected using >.

(For information on using the keyboard, see page 23.)

NOTE

The system starts with **Street** in order to avoid misunderstanding when two nearby cities/localities have grown together.

Alternative 1

Select **Street** (**Street**) without selecting a city.

If the street name exists in several cities then a list is shown with alternatives to choose between. The system guides to the centre of the selected street.

Alternative 2

- 1. Start by selecting City.
- 2. Then select Street.

NOTE

The definition of city or area can vary from country to country, and also within the same country. In some cases a metropolitan area is indicated - in others an individual suburb.

For smaller localities there are no street addresses stored in the system. The centre of the locality should always be selected as the destination.

Specify street number

If the selected address has a street number then this can be specified to clarify the destination.

 Scroll to the line for Number after specifying the street address, and press ENTER.

If the street number is not specified then the system guides to the middle of the selected street.

Alternatively:

- 1. Specify required street number.
 - > Alternative street numbers are shown.
- 2. Scroll to **Select** and press **ENTER**.

Cancel

Go back to previous screen.

Set junction

 Scroll to Intersection (Junction) and select a street that intersects the selected street.

Start guidance

- Scroll to Start guidance to start the guidance.
- 2. Scroll to **Select** to add the input address to the itinerary.

Information

Provides information about the destination.

Search by post code

Set destination → Address → City

Instead of searching in a city you can choose to search within a post code area.

- 1. Select City and press ENTER.
- 2. Scroll to Post code and press ENTER.
- Select the characters and press ENTER or select from the list of alternatives.
- Scroll to Street to choose between addresses with the selected post code and press ENTER.
- Scroll to Start guidance to obtain guidance to the destination.

This also applies when searching for facilities.

Search in facilities

Set destination → Facilities

Facilities is a collective name for petrol stations, hotels, restaurants, Volvo dealers, hospitals, car parks etc.

 Press ENTER to access a submenu with different search options in order to set a facility.

Facility by name (Facility by name)

- Enter the name of a facility, or select from the options in the menu.

The list only displays the facilities in the selected city/area.

Around the car (Around the car) Search out of Last 5 or All types.

The system searches for facilities around the car (max. 100 km radius). The search is stopped after 40 facilities have been found.

Along the route (Along the route) Search out of Last 5 or All types.

When a destination has been specified the system can search for facilities in an area along the route, (within 1 km from the route).

Around point on map (Around point on map)

The system searches in the same way as Around the car, but around a chosen point on the map.

- 1. Move the hairline cross around the map using the navigation button.
- 2. Press ENTER to access the Scroll menu.

Along a street (Along a street) The system searches along a specified street.

NOTE

It is also possible to search for facilities around the car, along the route and along the motorway via the Quick menu, see page 30.

Facility types/Different categories

Set destination → Facilities → Facility by name

The system first sets the cursor on Type. Last selected Country is preselected.

If this is not the case:

1. Scroll to Country and/or City and press ENTER.

Or choose from between the most recently selected using >.

- 2. Scroll to Name and press ENTER to specify a facility name without specifying a city.
- 3. Scroll to **Select** and press **ENTER**.
- 4. Then scroll to Start guidance and press **ENTER** for guidance to the destination.

NOTE

To refine a search, select City first and then scroll to Name.

There are subcategories for restaurants for example to simplify the search.

Information on facility

The address, coordinates and in some cases the telephone number of the facility are shown under Information. If the car is equipped with built-in phone then the function Call is also activated.

Call

The phone dials the specified number.

Map

Shows facility location on the map.

Other facilities

Airports, for example, often have restaurants. petrol stations etc. directly adjacent to them.

Instead of searching for Restaurant in the main menu, select Restaurant directly under the selected Airport.

Avoiding alternatives outside the airport area simplifies and speeds up the search.

Stored locations

Set destination → Stored locations

A stored location is a destination saved earlier. e.g. home address, favourite restaurant, airport. Volvo dealer. For information on how to store a location, see page 52.

Scroll between the stored locations and press > or ENTER to access the submenu.

Add to itinerary

Adds the stored location to the itinerary.

Information

Provides information about the stored location.

Edit

Change name, add sound, etc. at the stored location. See the following heading: Add info about stored location

Sorting

Sort stored locations according to icon or name.

Delete location

Deletes a stored location.

Del. all

Deletes all stored locations.

Move the position of a stored location

- Select Edit, scroll using > to Adjust and press ENTER to specify a new position for the stored location on the map.
- Use the navigation button to move the hairline cross to the new position, then press ENTER.
- 3. Then select **Store location** and press **ENTER** to save the location.

Add info about stored location

 Select Edit,, scroll using > to Add info. and then press ENTER to add further information on the stored location.

Every stored location can be provided with the following information:

- Alarm On/Off (...for notifying the driver that the location is nearby)
- Icon
- Name

- Address
- City
- Country
- Phone
- _
- E-mail
- URL

Select from among the last 20

Set destination → Last 20

A list with the twenty most recent destinations is displayed.

Scroll to the desired destination using >
 or ENTER to access the submenu.

Add to itinerary

Adds the destination to the itinerary.

Information

Provides information about the destination.

Delete location

Deletes the location from the Last 20 list.

Del. all

Deletes all addresses from the list Last 20.

Return trip

Set destination → Return trip

Select Start guidance and press ENTER.

The system then starts guidance back to the location where **Start guidance** was last selected.

Search via point on map

Set destination → Point on map

- Use the navigation button to move the hairline cross to the required destination, then press ENTER to access the Scroll menu.
- 2. Select Set as destination, see page 42.

It is also possible to search directly on the map with the hairline cross by using the **navigation button** in Map mode.

03

03 Advanced user settings

Set destination

Search via latitude/longitude

Set destination → Latitude/longitude

- Select a destination by entering the coordinates for the destination.
- Specify latitude using the navigation button, select N for north or S for south.

NOTE

London is at longitude 0 (zero). Localities west of London's longitude are specified with W (West) and localities east of it are specified with E (East).

Scroll to the next line and specify longitude. Select E for east or W for west.

Press **OK**

- > Shows the location of the specified coordinates on the map.
- 4. Press ENTER to reach the Scroll menu.
- Scroll to Set as destination and press ENTER to select the location as a destination.
- 6. Press **BACK** to return to coordinate input.

Cancel

Return to previous screen.

Itinerary

Draw up an itinerary

Destination/intermediate destination

The Itinerary (Itinerary) menu option is available only once a destination has been input.

Create an itinerary with several intermediate destinations to avoid entering destination after destination during your trip. One final destination with up to six intermediate destinations can be specified in an itinerary.

Start guidance (Start guidance)

Itinerary

Starts guidance to the destination.

Add to itinerary (Add to itinerary)
Here, further intermediate destinations are
added to the itinerary, see page 46.

Route options (Route options)
Show/set route options, see page 56.

Clear itinerary (Clear itinerary)
Deletes the whole itinerary.

Itinerary layout

Itinerary

Select an input destination and press
 ENTER or ➤ to access the submenu.

Information (Information)

Provides information about the destination.

Delete (Delete)

Deletes the destination from the itinerary.

Move (Move)

Changes the location of the destination in the itinerary.

Adjust (Adjust)

Changes the location of the destination on the map.

Store (Store)

Saves the destination that will be available under **Stored locations**.

03 Advanced user settings

Itinerary

Deleting in the itinerary

Itinerary

Delete the whole itinerary

All intermediate destinations and the final destination are cleared.

 Scroll directly to Clear itinerary and press ENTER.

Delete intermediate destination in the itinerary

- Select one of the input intermediate destinations and press ENTER or > to access the submenu.
- 2. Scroll to Clear and press ENTER.

NOTE

Intermediate destinations are automatically deleted from the itinerary once they are passed.

Store for re-use

Up to 250 destinations can be stored for re-use in different itineraries.

An acoustic signal that notifies the driver of the fact that the stored location is approaching, and that further information can be linked with the stored location, see page 49 - Add info about stored location.

Itinerary

Saving a location from the itinerary

- Scroll using the navigation button to the destination you want to store and press ENTER or > to access the submenu.
- 2. Select Store and press ENTER.
- Select the symbol to be displayed in the map by pressing the navigation button, then press ENTER.

- 4. Enter the required name.
- 5. Scroll to Store (Store) and press ENTER.

Save a location on the map

Scroll menu

- Scroll using the navigation button in Scroll mode to the point to be stored, then press ENTER.
- Select Store location (Store location) in the Scroll menu and press ENTER.
- Select the symbol to be displayed in the map by pressing the navigation button, then press ENTER.
- 4. Enter the required name.
- 5. Scroll to Store and press ENTER.

Itinerary

Next destination in itinerary

Next destination

The map image displays the next destination.

 Press ENTER or > to obtain information on the destination, such as name, remaining journey time or distance from present position to the destination, for example.

- Press ENTER again when more destinations are specified in order to obtain information and to view them on the map image.
- Scroll to Map (Map) and press ENTER to view the map image of the area.

Current position

Current position

Current position

The map image shows the car's position.

 Press ENTER or > to obtain information on the location, such as name and coordinates for example.

GPS

Specifies the number of satellites the system is in contact with.

Traffic information

Traffic information

Settings → **Traffic information**

Irrespective of whether **Easy** or **Advanced** user settings are selected, traffic information transmitted is always received and presented. For more information, see page 62.

NOTE

Traffic information is not available in all areas/countries.

Route options

Settings → Route options

- 1. Scroll between the functions, select the required setting and press ENTER to save the settings.
- Press BACK to cancel.

Route

Select a fast, short or simple route when calculating a route.

- Fast: As far as possible the system prioritises major roads with high speed limits.
- Short: As far as possible the system prioritises the nearest road.
- Easy: As far as possible the system prioritises roads that do not involve complicated manoeuvres and junctions.

NOTE

When calculating a route, the system takes into consideration the alternatives that the driver has chosen to avoid to the greatest possible extent. However, exceptions are made if there is no other reasonable alternative available.

Avoid motorways

Indicate whether motorways are to be avoided when calculating a route.

Avoid toll roads

Indicate whether toll roads are to be avoided when calculating a route.

Avoid ferries

Indicate whether car ferries are to be avoided when calculating a route.

Avoid car train

Indicate whether car trains are to be avoided when calculating a route.

Avoid traffic problems

Indicate whether the system should give consideration to traffic problems when calculating a route.

Avoid time-restr, roads

- Select Yes if you want the system to completely avoid time-restricted roads when calculating a route.
- Select No if the system is to give consideration to time-restricted roads when calculating a route.

The system uses the time in the car's clock to determine whether a road should be avoided.

NOTE

If a time zone is crossed then the car's clock must be adjusted.

Avoid specified areas

Select an area which the itinerary is to avoid by selecting an area with a square field directly on the map.

Settings → Route options → Avoid specified areas → Selected

- 1. Call up the map by clicking with > on Selected, click with > on Map and then **ENTER** on one of the options in the list displayed.
 - > Scroll to the required area with the marker field, then press ENTER.
- 2. To change the size: Select Adjust size (Adjust size) and press ENTER.
 - > Change the shape of the marker field using the navigation button so that it

covers the area to be avoided, then press **ENTER**.

In the same way, the marker field mode can be changed under Adjust area (Adjust area).

- Select Set area to avoid and press ENTER.
 - > The selected area is saved to a list in which a number of areas can be stored and activated when required.
- Agree to avoidance of the area with ENTER on OK and a cross in the list.
 - > The system will then, as far as possible, avoid this area in the itinerary.

The areas stored in the list can be adjusted in terms of size and geographical location under Edit, and they can be deleted permanently from the list with Clear. A number of activated areas can be deactivated simultaneously using the None option.

NOTE

The accuracy of the marker field is best in 2D map view.

Reset to default

Restore factory settings for Route options.

Press ➤, select OK and press ENTER.

Map options

Settings → Map options

Select settings for how the map is to be displayed on screen.

Scroll between the options using the navigation button and press ENTER to save.

Facility selection

Press > to access the submenu's options.

- Show all: All facilities symbols are shown on the map image.
- Hide all: No symbols are shown.
- Show selected: Press > to view all symbols which can be shown on the map image. Then select symbols as follows:
- 2. Activate the required symbols with a cross with **≺** or **>**.
- 3. Press ENTER to save.

Map

Choose between the options Show and Hide.

If the map is hidden, the system guides with an arrow.

Right map settings

Select whether the map is to be displayed in 2D (from directly above) or 3D (obliquely from above).

- With the 3D option the direction of travel is always upwards on the screen.
- With the 2D option select whether Direction of travel or North is to be upwards on the screen.

Left map settings

See the description in the previous section.

NOTE

If 3D is selected for the map on the right, the map on the left can only display 2D.

Compass

Choose whether the compass is to be displayed on the screen.

Current location

Indicate whether the name of the street/road on which the car is currently driving should be shown at the bottom of the screen.

Reset to default

Restore factory settings for Map options.

Press >, select OK and press ENTER.

Guiding options

Settings → Guiding options

Time/dist. to go

Select one of the alternatives RTA/ ETA/ Hide.

- RTA (Remaining Time to Arrival): Remaining time to arrival.
- ETA (Estimated Time of Arrival): Estimated time of arrival.

The time set on the car's clock governs the time set for ETA.

Facility warning

The driver is notified with an acoustic signal when approaching an accident blackspot or safety camera.

 Select Yes to hear an acoustic warning signal, or No if no signal is required.

Which areas have accident blackspots and/or safety cameras marked on the map is regulated by legislation in the respective countries. For current information, see www.volvocars.com/navi.

Reset to default

Restore factory settings for Guiding options.

Press >. select **OK** and press **ENTER**.

System options

Settings → System options

- 1. Scroll between the functions using the navigation button, then press ENTER to save the settings.
- Press BACK to cancel.

Guiding voice

Select the guiding voice you want as the setting: Female/ Male 1.

Guidina volume

Set the volume for voice messages.

Language

Sets language for menus, text and voice messages.

Menu colour

Select Black, Chrome or Blue for the appearance of the menus.

Map colour

Select Light 1. Light 2 or Dark.

The light colours are intended for daylight and dark for night or in darkness.

Screen saver

Indicate whether the screen saver should be used (the screen goes out 30 seconds after the last keystroke).

Help

Indicate whether help texts should be displayed at bottom of the screen.

Distance Unit

Select the unit to be displayed for distance km or miles.

User settings

Switch between Easy and Advanced mode.

Date & time info

Select how the date and time are to be displayed.

GPS information

Press > to see coordinates and address for the car's position, as well as the number of satellites the system is in contact with.

About

Shows system and map information.

Reset to default

Restore factory settings for System options.

Press >, select **OK** and press **ENTER**.

¹ Not applicable to the Netherlands. Instead there is the choice of language between Nederlands and Belgisch.

Simulation

Start demo (simulation)

Settings → Start demo

Demo demonstrates the system when the car is stationary by simulating a journey to a specified destination.

It is also possible to make settings during the demonstration.

Stop demo stops the simulation.

NOTE

A destination must be specified for the demonstration to work.

TRAFFIC INFORMATION

General

Display and reception

Traffic information that is transmitted is always received and presented, irrespective of whether Easy or Advanced user settings are selected.

The settings for how traffic information should be presented can only be changed in Advanced mode, see page 40.

The presentation of traffic information also depends on how it is transmitted.

NOTE

Traffic information is not available in all areas/countries.

The transmission range for traffic information is being increased continuously.

Traffic symbols on the map

Traffic problems are marked with symbols, lines and frames. These are coloured red or yellow.

Red - Important information.

Yellow - General information.

Accident

Slow traffic

Slow traffic in both directions

Stationary traffic

Area message

C

Other information

Extent

Certain traffic messages also contain information on the extent of the traffic obstruction.

On all scales up to 5 km the extent is marked with a red or yellow line along the route affected. The length of the line is corresponds to the extent (distance) of the traffic problem.

Avoiding traffic problems

Avoid traffic problems

Settings → Route options

Select whether or not the system should plan to bypass the traffic problem.

- 1. Set Avoid traffic problems.
- 2. Choose between Yes and No.

Yes

The system avoids roads with traffic problems when calculating a route.

No

The system does not avoid roads with traffic problems when calculating a route.

NOTE

When the system is started it can take up to approx. 15 minutes before all traffic information for the area is loaded.

Auto. notification

Settings → Traffic information → Dyn. route guiding

Select whether or not transmitted traffic information should be shown.

Yes

The system provides the option to select an alternative route to bypass any traffic problems.

No

The system provides no information on traffic problems but instead plans the route through the areas with possible traffic problems.

This function is activated automatically the first time the system is started.

Messages along the route

Once you have selected and clicked on a symbol for traffic problems, the following screen appears asking **Calculate new route?** (Calculate new route?).

Select one of the alternatives:

Yes (Yes)

A new route is calculated - around and past the problem.

No (No)

Guides up to and through the problem.

Map (Map)

Shows map with the new route highlighted.

Selecting information

Traffic-info, selection

Select the type of traffic information the system should display and to be considered in the event of calculating a route.

Settings → Traffic information → Traffic info. selection

Show all

All traffic information is available.

Hide all

No traffic information is displayed.

Show selected

- 1. Press > to enable selection from symbols.
- 2. Select using \bigwedge or \bigvee the traffic information symbols (traffic messages) the system should show on the map.

- 3. Activate and deactivate respectively using **>** or **<**.
- 4. Confirm the settings with ENTER.

Traffic signs on the map

Slippery road

Other hazard

Reading information

Read traffic message

Detailed traffic information.

Read traffic msg.

A traffic message is indicated by a symbol on screen. To read a traffic message:

1. Press ENTER to call up the Quick menu:

- Scroll to using or , then press ENTER, see page 40 and 41.
 - > Current messages are marked with a red or yellow frame.

4. Press **BACK** to enable browsing between current messages again.

The traffic messages relevant to the map area are indicated on the screen.

Detailed information on the traffic problem is also shown. The extent of the problem is shown at the top. If the traffic problem is located along the selected route then the distance to it is specified.

If details are available, the following are also displayed:

- duration
 - restrictions on speed, vehicle width and height
- roads affected
- etc.

Scale

The scale of the map determines how great a quantity of traffic information can be shown the larger the map area shown on the screen, the more information is provided. For more information, see page 30.

04 Traffic information

Transmitters

Search/select station for traffic info

Settings → Traffic information → Search station

The system automatically searches stations for traffic information, but a specific station can also be selected.

Search stations

Press ENTER to search for existing stations.

Select station

- 1. Press **ENTER** to select from among existing stations.
- Select station using ★ or ▼ and press ENTER.
- 3. Press **BACK** to return to the previous screen.

Current station

Shows the current station for traffic information.

Reset to default

Restore factory settings for station settings.

Press ➤, select OK and press ENTER.

04

SYMBOLS ON THE MAP

05 Symbols on the map

Landmarks and road numbers

Landmarks

Many countries/cities have well known landmarks that can be used as target points.

When the map scale is set to 1 km or lower then a selection of landmarks is shown e.g. churches and castles.

(i) NOTE

Landmarks are only available for Europe.

Road numbers

Local road numbers and international numbers are shown on the map.

Mountain peaks

Mountain peaks shown on the map scale are set at 5 km or lower (only applies to particular areas).

Frequently asked questions

The position of the car on the map is wrong

The GPS system shows the position of the car with an accuracy of about 20 metres.

There is a greater chance of error when driving on roads lying parallel to another road, on winding roads, on roads on several levels and after driving a long distance without making any distinctive turns.

High mountains, buildings, tunnels, viaducts, over/underpasses etc. also have a negative affect on the reception of GPS signals, which means that accuracy in calculating the position of the car may decrease.

The system does not always calculate the fastest/shortest route

When calculating a route, distance, width of road, type of road, number of right or left turns, roundabouts etc. are all taken into account in order to produce the best theoretical route. A more efficient selection of route may be possible based on experience and knowledge of the area.

The system uses toll roads, motorways and ferries even though I chose to avoid them

For technical reasons, the system can only use larger roads when calculating a route extending over a long distance.

If **No** is selected for toll roads and motorways, then they are avoided to the greatest possible extent and are only used if there is no other reasonable alternative available.

The position of the car on the map is incorrect after transportation

If the car is transported, for example by ferry or train, or in such a way as to impede the reception of GPS signals, it can take up to 5 minutes before the position of the car is correctly calculated.

The position of the car on the map is incorrect after the car battery has been disconnected

If power has been cut from the GPS antenna, it can take more than 5 minutes for the GPS signals to be received correctly and the position of the car to be calculated.

The car symbol on screen behaves erratically after a tyre change

In addition to the GPS receiver, the car's speed sensor and a gyro assist in calculating the current position and direction of travel of the car. After fitting the spare wheel or changing from summer to winter tyres the system needs to "learn" the size of the new wheels.

To achieve the optimum functionality of the system it may therefore be necessary to drive a number of kilometres including several significant turns.

The map image does not correspond with the real situation

Factors such as the constant expansion and rebuilding of the road network, new traffic regulations constantly being introduced etc. mean that the digital map database is not always complete. The information stored in the maps is constantly being developed and updated. Your Volvo Dealer can provide further information.

See also www.volvocars.com/navi for further information on maps etc.

The scale of the map sometimes changes

There is no detailed map information in certain areas. The system then automatically changes the degree of magnification.

The expected menu option is missing

Check the settings that have been made. Select **Reset to default** for the function in order to restore the original settings.

The system shows the route I am already on

The system cannot find a good alternative to the current route when I selected Calculate new route or Diversion.

06

Frequently asked questions

The car symbol on screen jumps forwards or spins

The system may need a few seconds to sense the position and movement of the car before driving off. Switch off both the system and the engine. Start again, but remain stationary for a while before starting to drive.

I'm going to make a long journey but do not want to specify a special destination to the cities I am thinking of travelling through. How do I most easily create an itinerary?

Specify the destination directly on the map using the hairline cross. The system automatically guides you to the final destination even though you are driving beside the intermediate destinations.

Why do I not always receive traffic messages?

The function is not accessible, fully developed or not available in all markets. Check also that the correct settings are made under **Route options**.

My map information is not up-to-date

Contact your Volvo Dealer regarding the updating of map data.

EULA - License agreement

NOTICE TO THE USER

PLEASE READ THIS END USER LICENSE AGREEMENT CAREFULLY BEFORE USING THE NAVTEQ DATABASE.

THIS IS A LICENSE AGREEMENT - AND NOT AN AGREEMENT FOR SALE - BETWEEN YOU AND NAVTEQ EUROPE B.V. FOR YOUR COPY OF THE NAVTEQ NAVIGABLE MAP DATABASE, INCLUDING ASSOCIATED COM-PUTER SOFTWARE, MEDIA AND EXPLANA-TORY PRINTED DOCUMENTATION PUB-LISHED BY NAVTEQ (JOINTLY "THE DATA-BASE"). BY USING THE DATABASE, YOU ACCEPT AND AGREE TO ALL TERMS AND CONDITIONS OF THIS END USER LICENSE AGREEMENT ("AGREEMENT"). IF YOU DO NOT AGREE TO THE TERMS OF THIS AGREE-MENT, PROMPTLY RETURN THE DATABASE, ALONG WITH ALL OTHER ACCOMPANYING ITEMS. TO YOUR SUPPLIER FOR A REFUND.

OWNERSHIP

The Database and the copyrights and intellectual property or neighbouring rights therein are owned by NAVTEQ or its licensors. Ownership of the media on which the Database is contained is retained by NAVTEQ and/or your supplier until after you have paid in full any amounts due to NAVTEQ and/or your supplier pursuant to this Agreement or similar agreement(s) under which goods are provided to you.

LICENSE GRANT

NAVTEQ grants you a non-exclusive license to use the Database for your personal use or, if applicable, for use in your business' internal operations. This license does not include the right to grant sub-licenses.

LIMITATIONS ON USE

The Database is restricted for use in the specific system for which it was created. Except to the extent explicitly permitted by mandatory laws (e.g. national laws based on the European Software Directive (91/250) and the Database Directive (96/9)), you may not extract or reutilise substantial parts of the contents of the Database nor reproduce, copy, modify, adapt, translate, disassemble, decompile, reverse engineer any portion of the Database. If you wish to obtain interoperability information as meant in (the national laws based on) the European Software Directive, you shall grant NAV-TEQ reasonable opportunity to provide said information on reasonable terms, including costs, to be determined by NAVTEQ.

TRANSFER OF LICENSE

You may not transfer the Database to third parties, except when installed in the system for which it was created or when you do not retain any copy of the Database, and provided that the transferee agrees to all terms and conditions of this Agreement and confirms this in

writing to NAVTEQ. Multi-disc sets may only be transferred or sold as a complete set as provided by NAVTEQ and not as subset thereof.

LIMITED WARRANTY

NAVTEQ warrants that, subject to the warnings set out below, for a period of 12 months after acquisition of your copy of the Database, it will perform substantially in accordance with NAV-TEQ's Criteria for Accuracy and Completeness existing on the date you acquired the Database: these criteria are available from NAV-TEQ at your request. If the Database does not perform in accordance with this limited warranty, NAVTEQ will use reasonable efforts to repair or replace your non-conforming copy of the Database. If these efforts do not lead to performance of the Database in accordance with the warranties set out herein, you will have the option to either receive a reasonable refund of the price you paid for the Database or to rescind this Agreement. This shall be NAV-TEQ's entire liability and your sole remedy against NAVTEQ. Except as expressly provided in this section, NAVTEQ does not warrant nor make any representations regarding the use of results of the use of the Database in terms of its correctness, accuracy, reliability, or otherwise. NAVTEQ does not warrant that the Database is or will be error free. No oral or written information or advice provided by NAV-TEQ, your supplier or any other person shall

EULA - License agreement

create a warranty or in any way increase the scope of the limited warranty described above. The limited warranty set forth in this Agreement does not affect or prejudice any statutory legal rights that you may have under the legal warranty against hidden defects.

If you did not acquire the Database from NAV-TEQ directly, you may have statutory rights against the person from whom you have acquired the Database in addition to the rights granted by NAVTEQ hereunder according to the law of your jurisdiction. The above warranty of NAVTEQ shall not affect such statutory rights and you may assert such rights in addition to the warranty rights granted herein.

LIMITATION OF LIABILITY

The price of the Database does not include any consideration for assumption of risk of consequential, indirect or unlimited direct damages which may arise in connection with your use of the Database. Accordingly, in no event shall NAVTEQ be liable for any consequential or indirect damages, including without limitation, loss of revenue, data, or use, incurred by you or any third party arising out of your use of the Database, whether in an action in contract or tort or based on a warranty, even if NAVTEQ has been advised of the possibility of such damages. In any event NAVTEQ's liability for

direct damages is limited to the price of your copy of the Database.

THE LIMITED WARRANTY AND LIMITATION OF LIABILITY, SET FORTH IN THIS AGREEMENT, DO NOT AFFECT OR PREJUDICE YOUR STATUTORY RIGHTS WHERE YOU HAVE ACQUIRED THE DATABASE OTHERWISE THAN IN THE COURSE OF A BUSINESS.

WARNINGS

The database may include incorrect or incomplete information due to changes over time, changes of circumstances, the quality of the sources used and the process used for collection of extensive geographical data. All of these situations may lead to erroneous results. The Database does not include or reflect information on - inter alia - neighbourhood safety; law enforcement; emergency assistance; construction work; road or lane closures; vehicle or speed restrictions; road slope or grade; bridge height, weight or other limits; road or traffic conditions; special events; traffic congestion; or travel time.

GOVERNING LAW

This Agreement shall be governed by the laws of the jurisdiction, in which you reside at the date of acquisition of the Database. Should you at that moment reside outside the European Union or Switzerland, the law of the jurisdiction

within the European Union or Switzerland where you acquired the Database shall apply. In all other cases, or if the jurisdiction where you acquired the Database cannot be defined, the laws of the Netherlands shall apply. The courts competent at your place of residence at the time you acquired the Database shall have jurisdiction over any dispute arising out of, or relating to this Agreement, without prejudice to NAVTEQ's right to bring claims at your then current place of residence.
